

# EVERY JOB IS INSPIRING

# inspiring the future

At Inspiring the Future, we believe every volunteer has a story to tell about their career path, whatever their background, position and career span. Students are fascinated by the huge variety of different jobs available to them and would love to hear all about them!

Saalihah is an office administrator. She told the students about organising a DJ for a company wide event. She brought her headset with her and talked about how important it was for her to always be available to speak.

Ryan works in a dairy factory. The students were fascinated by how cheese was made and loved hearing about how smelly it is! He even brought in a sample for the students to smell!

Fahim is a Care Assistant in a nursing home. He explained the best thing about his job is the friendships he has made and showed the students a birthday card a resident wrote for him.

James is a Sales Manager. He told the students that sometimes he works throughout the night! The students loved hearing about how he has seen some famous people come through to get their shopping! He brought in his Tesco's uniform and the students enjoyed trying it on.

Natalie is a Pharmacist. She explained that after 4 years of training, she has acquired the knowledge to advise customers on the side effects of medications. The students were really interested in a pill box she brought in which demonstrated how medication can be organised.

Angela is an accountant for a charity. When using Primary Futures, Angela shared how she the responsibility of ensuring staff get paid. She brought a calculator along with her and showed the students the charity's fundraising total this year.
